

ZIONISM

There is biblical Zionism and political Zionism. Most people are upset about political Zionism.

1 Herzog was the first Jewish Zionist. He became so back in the early 1900's. He tried to put forward a political campaign to establish a Jewish state. When Begurion and others formed the state of Israel they made reference to Hertzogs political Zionism. This was the Balfor declaration and the UN mandate calling for a Jewish homeland. The object of that political Zionism was to build a nation of Israel. Those Arab states

(Palestinians) who hate Israel consider Zionism to be very contrary to their beliefs. They have gone so far as to think that Zionism is like bigotry, like racial. They consider Zionism to be anti-Arab and anti-world by nature. The Arabs rejected Israel as a nation back in 1948 and have never stopped rejecting Israel as a nation. Israel has been around as a Nation for over sixty years yet these anti-Semitic people still say it is an illegal state.

2 Biblical Zionism is the belief that there will be a return of a Jewish nation. That there will be a return of the Jewish people before the last days. The people must return to the land before Yeshua returns. The restoration of the land will take place before the end times. The Messiah will come out of Zion is how it is described in scripture.
